EDUCATION

Graphic Era Hill University, Bhimtal

2022 – 2026

B.Tech in Computer Science and Engineering

CGPA: 7.91

St. Paul's Senior Sec School

2021 – 2022

Intermediate

Percentage:85.6%

EXPERIENCE

Salesforce (Virtual Internship Program)

May 2025 – July 2025

Intern – Salesforce Ecosystem and CRM Tools

Haldwani, Uttarakhand

- Built and customized backend data objects, validation rules, and multi-step approval processes on the Salesforce platform, improving data integrity across workflows.
- Applied Apex and Process Builder to design 2 custom objects and 10+ fields, enabling automated, rule-based data tracking and reporting for the sales team.
- Worked with Object Relationship Management and Lightning App Builder to model relational data structures within a production-style CRM environment.

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript (ES6+), HTML5, CSS3, SQL

Backend: Node.js, Express.js, RESTful APIs, Apex

Auth: JWT, bcrypt, Role-Based Access Control

Databases: MongoDB, MySQL

Frameworks/Libraries: React.js, Tailwind CSS

Tools: Git, GitHub, Docker, Postman, VS Code, Vite, NPM

AI/LLM (Basics): LangChain, Prompt Engineering, Structured Output (Pydantic, JSON Schema)

Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

PROJECTS

TaskFlow – Full-Stack Task Management App | *React, Node.js, Express, MongoDB, JWT*

- Designed and built a RESTful backend in Express.js with per-user task scoping, ensuring isolated, secure data access for each authenticated user.
- Implemented JWT-based authentication with bcrypt password hashing, securing all protected API routes end-to-end.
- Modeled task and user schemas in MongoDB and deployed the backend on Render with the frontend on Vercel, maintaining a stable production environment.

End-to-End Healthcare Appointment Web App | *JavaScript, React, Node.js, MongoDB*

- Implemented JWT authentication with role-based access control (admin/doctor/user), securing 100% of protected backend routes.
- Built and managed 20+ RESTful API routes in Express.js across user, doctor, and admin modules using modular MVC design.
- Integrated the Razorpay payment gateway on the backend, enabling real-time transaction processing with under 200ms latency in sandbox mode.

Recursive Call Visualizer | *JavaScript, Canvas API, Algorithms*

<https://github.com/AbhaySrivastav18/Call-stack-Visualizer>

- Built an interactive recursive call-stack visualizer, modeling function call state and stack frames to render real-time recursion animations.
- Optimized the underlying recursion-tracking logic to handle 50+ recursive calls per run with smooth, lag-free rendering.

ACHIEVEMENTS

Solved 200+ data structures and algorithms problems on LeetCode, with a focus on problem-solving relevant to backend systems and API design.
